

Camilo made a fantastic website for my small business! After six years, my shop's original website needed to be replaced. Camilo did a great job of cleaning up my old site's content and integrating it into the new site. The new site's improved content management system has tools created by Camilo that maintain consistency throughout the website and save me a lot of time.

As a time-strapped small-business owner, I very much appreciate Camilo's good-natured patience, straight forward communication and his clear understanding of how I and my customers interact with my site as well as the web at large.
